

GENERAL INSTRUMENTS

**WAX &
MODELING
CARVERS**

Wax and modeling carvers are used to shape and refine wax models, such as those used for dentures, crowns, and bridges, ensuring anatomical accuracy. They can be used to smooth edges and surfaces, enhancing the final aesthetic of dental restorations

SUCTION
TUBES

Suction tubes are designed to remove fluids, debris, and other materials from the oral cavity during various dental procedures. They eliminate saliva from the treatment area, keeping the field dry and improving visibility.

**TOWEL
CLAMPS**

Towel clamps are used to hold drapes and towels in place, ensuring a clean and organized working area during dental procedures. They feature a locking mechanism that securely holds towels in place.

CASSETTES

Cassettes provide a structured way to organize dental instruments, ensuring that everything is easily accessible and in one place during procedures. By securely holding instruments in place, cassettes help prevent damage during transportation, reducing wear and tear.
